

Diadema Junior Extra/Junior Extra dual boiler PID

The Diadema Junior is a beautifully finished machine and includes a large 3 litre tank. The heat exchanger version (HX) incorporates a 2L boiler.

Usability is excellent with ball-jointed steam wands for perfect microfoam and a large capacity drip tray. Also included is a low water level alarm.

The e-61 group head employed in the Junior range ensures optimum thermal conduction and retention, crucial for extracting and delivering the very best flavour and crema that freshly ground coffee produced on demand has to offer. Precise brewing temperatures are produced by the heat exchanger thermosyphon circulation system and progressive piston infusion in the famous e-61 group head which contains 4.5kg of brass. These attributes will delight any true coffee lover searching for the ability to create the perfect cup. We are highly impressed by the Junior Extra.

A recent addition to this range is the Diadema Junior Extra dual boiler PID version. This version has an optimum 0.8L brew boiler and 1.3L steam boiler and offers the option of economy operation selectable via a two position switch on the front panel- thus saving power. The PID control is located between the two gauges and is the Gicar unit found in some Expobar, Izzo and other superior espresso machines.

Diadema Junior Extra Specifications

Boiler capacity	2.0 litre HX (0.8L brew and 1.3L steam in PID version)
Fresh water tank	3.0 litre
Voltage	230 v 50 Hz.
Watt	1300 w (2 x 1300W in PID version)
Dimensions (W x D x H)	Approx 342 x 477x 420 mm
Weight	Approx 24kg
Warranty	All new machines for home use carry a 12 month back to base warranty. Machines for business use carry a 12 month parts and 3 month labour warranty. During this period, the machine is returned to us at the customers cost and we will return it at our cost. Normally we will aim to return the machine within 5 working days.

Exclusions: Misuse, user modified equipment, gaskets and seals and damage caused by scaling.
