

## Diadema Junior-plus semi-auto

The Diadema junior range represents a superb solution to those who desire an elegant design with simplicity in mind- for home or office with the ability to produce perfect espresso and silky textured milk

The Diadema junior has special improved features that include high-polish exterior finishes and a anodised steel chassis. Group operation is via funky retro-styled stainless steel toggles.

The e-61 group head employed in the Junior range ensures optimum thermal conduction and retention, crucial for extracting and delivering the very best flavour and crema that freshly ground coffee produced on demand has to offer. Precise brewing temperatures are produced by the heat exchanger thermosyphon circulation system and progressive piston infusion in the famous e-61 group head which contains 4.5kg of brass. These attributes will delight any true coffee lover searching for the ability to create the perfect cup.
