

ONA COFFEE DISTRIBUTOR VERSION 3

The ONA Coffee Distributor (OCD) is a coffee distribution tool, used to evenly distribute coffee in coffee machine baskets. Invented by former World Barista Champion, Sasa Sestic in 2012 and first produced in 2015.

The most exciting feature of the OCD V3 is that the cross-arm base is now coated with an **advanced, static-reducing coating** which will eliminate the build up coffee grinds on the base.

All improvements in OCD V3 to previous models are in order to make its operation more user-friendly.

NEW FEATURES OF THE OCD V3

- Textured sides for easy grip and non-slip;
- Reduced friction and generation of static electricity;
- Lightweight build (100g less than previous models);
- Brass base for reduced static;
- Colour range (Black, Titanium, Silver);
- Reduced retail price;
- Maintenance and How To Use Guide

PRODUCT SPECIFICATIONS

Diameter:

58.5mm (Fit ims or vst basket)
