_ Energy Efficiency

Setting:
– **Automatic**: allows the user to program timeslots up to 6 daily time frames
– **Manual**: allows the user to turn the machine or the individual boilers on and off manually

Two programmable modes:
– **Stand-by**: low power consumption condition, compliant with the ErP Directive (2009/125/EC)
– **Eco**: keeps the machine on, but at a reduced temperature for quick start-up

For both, the user can enable the Energy Saving function, which automatically turns the machine off after the set time.
